

# DC Rodent Bait Station

*Size: 24cm x 18cm. Height: 9cm*

**DC Rodent bait station** is devices that keep rodent baits and traps safely out of reach of non-target animals. It has lock down lids, open with key that help prevent children from touching rodent killing baits and traps.

**DC Rodent bait station** can be used indoors and outdoors. In commercial food processing plants, restaurants and other businesses located near food oriented stores. Keeping a constant supply of outdoor bait around buildings gives unwanted rats and mice a chance to feed on rodent baits before they have a chance to enter buildings.

**DC Rodent bait station** tamper resistant bait stations protect your rodent bait from moisture, dust or other contaminating elements while keeping rat baits out of reach of non-target animals. Locking lid is opened with key included with purchase of bait stations. These rodent baiters keep your bait fresh while providing a prime feeding station where rats and mice consume your rodent bait.

**DC Rodent bait station** tamper resistant bait stations are sized and shaped for the corners and small areas where precise placement of mouse rodent bait is important. Insert your mouse bait into the bait station; place the bait station in corners or against walls, in cupboards or other areas where mice are known to travel.

**DC Rodent bait station** automatically locked when lid is closed and is opened with the key. This locking system helps keep your mouse bait out of reach of pets and children but still offers a great feeding station for mice.

**Packing: 20pcs per carton**
