

DELETE 2.5%SC

(SINNEAI-SusCN/104/0612)

Deltamethrin 2.5%SC
Formulation: Suspension concentration

DELETE 2.5%SC is one of the strongest insecticides in the pyrethroids group, which controls a wide range of public health insects.

DELETE 2.5%SC is effective to control flying and crawling insects found in gardens and houses such as cockroaches, ants, flies, bugs, house flies and mosquitoes. It is a broad-spectrum insecticide with very strong stomach and contact poisoning activity, offering rapid knockdown and long residual activity, swift killing action to insects and low toxicity to beneficial insects.

Type of pest control: Cockroaches, mosquitoes, flies, ants, bed bugs and others crawling and flying insects.

Mode of action: Non-systemic insecticide with contact and stomach action, and repellent properties. It gives rapid knockdown and long residual activity.

Type of Spraying	Application Rate
<p>- Surface Treatment</p> <div style="display: flex; justify-content: space-around;">   </div>	<p>- Dilute 1 litre of DELETE-2.5%SC with 129 Litre of water, for control of crawling insects such as Bugs, cockroaches, fleas, ants apply 1 Litre of diluted spray solution /15-20 m².</p>
