

# DELETE WOOD PROTECTANT

(SINNEAI-EmlCN/104/0613)

**Deltamethrin 2.5%EC**

**Formulation: Emulsifiable concentrate**

**DELETE WOOD PROTECTANT** containing 2.5% w/w of Deltamethrin, solvents and emulsifiers. It is one of the strongest insecticides in the pyrethroids group, which controls a wide range of public health insects. It is effective to control and provide long lasting effect against most of the wood boring insects include powder post beetles, pinhole and shot hole borer, termites and woodworm.

**DELETE WOOD PROTECTANT** also protects logs, sawn timber, furniture, plywood, rattan, particleboard and most of the wood related products.

**Mode of action:** Is a non-systemic insecticide with contact and stomach action. It gives rapid knockdown and long residual activity.
