

Product Bulletin

Ultra Low Volume (ULV) Fogger Tri-Jet 6208, Portable

Particle size, VMD: 15 - 30 μ , adjustable. Liquid viscosity and density can affect particle size.

Discharge Rate: Adjustable 0 – 10 oz (300 ml) / min

Range: Visible fog, 20 -25 ft (6 – 7.5 metres)

Control Valve: One turn. Brass /w Buna N seal

Dimensions: L x H x Dia.: (32 x 39 x 22 cm]

Shipping Weight: 5.4 kg

Fogging technique and application:

The time-proven Fogmaster Tri-Jet® 6208 fogger serves a wide range of applications, both indoor and outdoor. A 6 – 7.5 metres range makes the Tri-Jet useful for large areas as well as small ones.

It can fog both water and oil based liquids. A one turn valve controls particle size in a range from a 15 micron intermediate fog to a 30 micron heavy mist. It's easy to calibrate the output rate when changing liquids.

The power head can be adjusted to up and down angles as required. Made of aluminum, its light weight, but tough.

This fogger can do it all... and has, for four decades. It's in daily use controlling odours, sanitizing, disinfecting, controlling flies, mosquitoes and other insects, carpet mildew control, dust suppression, humidification, flood and fire damage restoration and other innovative applications.

Another effective solution from Fogmaster.

Durable, versatile fogger for many applications.

Always read and follow instructions on the label of the chemical you are using.
