TERCOL POWDER- Termite powder

Imidacloprid 0.5%
Formulation: Powder (ready-to-use)

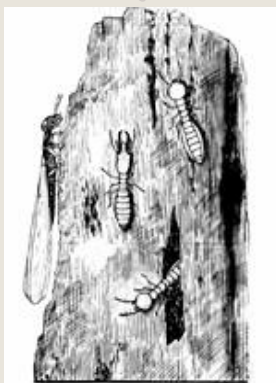

80gm   1kg

What is *TERCOL POWDER*

TERCOL POWDER is a ready-to-use termite killer powder for the use to treat active termite infestation. *TERCOL POWDER* is a NON-TOXIC systemic, chloro-nicotinyl insecticide use for the control of termites. It is effective on contact and via stomach action.

How is *TERCOL POWDER* apply

To treat active termite infestation, apply a small amount 1-2gm of *TERCOLPOWDER* to termite galleries. Symptoms are delayed, however, with result typically occurs about 7-10 days. This unique property allows for affected carrier termite to return to their colony and spread the poison to others by rubbing each other body and eventually fed to the queen. When the queen dies the nest dies as termites are unable to produce a replacement queen. In this way, the powder effectiveness is maximized.

Area of use

Under trees, gardens, landscape, ground, homes, woods, factory where termites is infested.

Packing: 80gm and 1Kg
